Conservation Through Collaboration: Landscape Irrigation Efficiency with

WRRC | March 13, 2024

Caitlin Brogan
Water Conservation Coordinator
**Waterfluence**

- Software program partners with water agencies to increase irrigation efficiency
- Estimates that overwatering constitutes 1/3 of all water applied to commercial & public landscapes

Water budgets as an efficiency tool

Waterfluence Insights

Resolve Last Month’s Spike

Check Your Irrigation System for Leaks
Your site’s water use was unusually high last month. You may want to inspect your irrigation system for leaks and stuck valves that waste water, compromise landscape appearance, and can potentially damage paving and buildings if not fixed.
