San Pedro Aquifer Report Released

In a new collaborative report, information about the binational San Pedro River Aquifer is now available from both the United States and Mexico. The International Boundary and Water Commission, the Mexican National Water Commission, the U.S. Geological Survey, and the Universities of Arizona and Sonora released this report on December 20, 2016. This marks the first time that federal government and university scientists from both countries have collaborated to collect data and prepare binational and bilingual databases and maps of the aquifer. Findings in this report improve the understanding of groundwater flow and will create a foundation for future studies, advancing our knowledge of the hydrology of the binational aquifer.

NEWS

Happy Holidays From The WRRC

Happy Holidays!

The end of the year brings no greater joy than the opportunity to express our season's greetings and good wishes. All of us at the Water Resources Research Center join in wishing you all a Happy Holiday Season with the best of everything in the coming New Year.

University Closure

Please note that our office will be closed during the University of Arizona's annual holiday closure December 24, 2016 to January 2, 2017. The UA and WRRRC will resume operations on Tuesday, January 3 2017.

Weekly Wave Returns in 2017

Due to the University closure, there will be an interruption in delivery of the Weekly Wave. Please be sure to look for the first issue of the new year on January 13, 2017.

ANNOUNCEMENTS

CALL FOR ABSTRACTS

UNIVERSITIES COUNCIL
ON WATER RESOURCES

2017 UCOWR/NIWR Annual Conference

Abstracts for oral and poster presentations should be submitted electronically by January 20, 2017

The Universities Council on Water Resources and the National Institute of Water Resources have issued a call for abstracts for the **June 13-15, 2017** conference in Fort Collins, Colorado. The conference, titled *Water in a Changing Environment*, will address gaps in projected water supply and demand, water quality and reuse, increasing food and energy needs, and the impact of a changing climate on water resources around the world.

To submit an abstract, click [here](#).
